

SCHOOLS' COMPOST CHALLENGE

Open to all local primary schools

Free entry – £25 total prize money – Rosettes

Can your school make the best compost?

We would like you to recycle vegetable peelings, **uncooked** kitchen waste, dead flower heads, grass clippings etc. and find out how worms break this down into compost.

You may use a wormery or a traditional composting method to make your compost.

Support is available from a Gloucestershire County Council 'Master Composter'.

BGS Summer Show: Display your student's photographs and/ or reports about how your compost heap or wormery started, how it is progressing and what interests them most.

BGS Autumn Show: Display a sample of the compost that your students have made plus a small selection of plants or produce grown using it.

Judging to take place at the BGS Autumn Show 2024

Contact the Show Secretary for further details and an entry form.
